RADA

HOW TO USE RADA

User Guide

Everything you need to find plans, meet people and run your own.

Nairobi · Version 1 · November 2026

RADA: spots, events and outings in Nairobi.

WELCOME

Welcome to RADA

RADA helps you find places to go, people to go with and things to do in Nairobi. This guide walks through every part of the app in plain steps.

Tab	What it is for
Home	Your feed: trending spots and events, offers from businesses, the weather and what is near you.
Spots	Browse and search venues by category, area, budget and ratings. Save the ones you like.
Outings	Join plans hosted by other people, or host your own and chat with the group.
Socials	Discover people, handle requests, chat one to one or in groups, and search for friends.
Vault	Your tickets, passes and what is happening today, all in one place.

Good to know

RADA is free to use. Hosts and businesses can pay for extra tools, but nothing you need to find a plan, chat, join an outing or stay safe is locked behind a payment.

Getting started

1. **Create your account or sign in**
   You can look around first as a guest. Sign in when you want to save places, chat or join outings.
2. **Pick your username**
   Choose a handle people will see. You can change your display details later in Account settings.
3. **Add a clear profile photo**
   A photo of just you, facing the camera, helps people trust your profile. You need one for the selfie check.
4. **Choose light or dark mode**
   The app follows your preference. Change it any time in settings.

EXPLORE

Home and Spots

Home

Home shows what is worth knowing today. Scroll through trending spots and events, deals from businesses and a quick weather note. Use the near-you control to see places close to where you are, and tap the bell to see your notifications.

Spots

Spots is the full list of places. You can narrow it down in a few taps:

- **Search** by name, vibe or type of place.
- **Filter** by category, neighbourhood, price level and ratings.
- **Look for the offer tag** to find places with running specials.
- **Open a spot** to see photos, details, menu or services, and a map.
- **Save** a spot so it is waiting in your saved places later.

Can’t find a place?

Use **Suggest a spot** to add it. Add a name, area, a few details and photos. After it is reviewed it can appear for everyone. Owners can later claim their spot (see For businesses).

Events and movies

Trending events, live shows and cinema listings sit alongside spots. Tap an event to see the date, place and how to get in.

GO OUT TOGETHER

Outings

An outing is a plan with a place, a time and a group. Anyone can join one, and anyone with a profile can host one.

Joining an outing

1. **Open Outings and pick a plan**
   You will see the place, date, host and how many spots are left.
2. **Tap Request to join**
   Some outings let you in straight away. Others wait for **Pending host approval**.
3. **Open the group chat**
   Once you are in, the outing has its own chat for the group. Say hello and agree where to meet.
4. **Share it**
   Use **Share outing link** to send the plan to friends.

Hosting an outing

1. **Tap to create a new outing**
   Pick a spot from the list. If it is not there, add a custom spot and venue details.
2. **Add details**
   A title, date and time, a short description and a cover photo.
3. **Set how many people**
   Choose the group size. Your plan decides the largest group.
4. **Manage attendees**
   Approve or decline requests and keep the group chat friendly.

Plan limits

Free hosts can run a few outings a month with smaller groups. If you see **Plan limit reached**, you can wait for next month or move to a higher host plan. See the Plans and Pricing document for details.

PEOPLE

Socials: Discover, requests and chats

Socials has four parts across the top:

Part	What you do there
Discover	Browse profiles of verified singles and send a match request, or pass. Discover is reserved for singles who have passed the selfie check.
Requests	See people who want to connect with you, and the requests you sent. Accept to start a chat.
Chats	All your one to one and group conversations. Unread chats show a dot.
Search	Find a person by username and say hello.

Inside a chat

- Send text, emoji, up to 5 photos, a video, a voice note or a video note.
- Swipe a message to reply to it.
- Tap the calendar icon to **plan a date** at a spot from RADA.
- Use the back arrow to return to your chat list.
- You can still create and join group chats even if you are not in Discover.

Be kind, stay safe

You can report or block anyone from their profile or chat. Meet in public places, tell a friend where you are going and trust your instincts.

VERIFICATION

The selfie check

The selfie check keeps Discover real. It takes under a minute and runs on your phone.

1. **Have a clear profile photo**
   One face, facing the camera.
2. **Open the selfie check from Discover**
   Allow camera access when your phone asks.
3. **Put your face in the oval and tap Start**
   Look straight at the camera and hold still for a moment.
4. **Turn your head slowly to one side, then back**
   This proves it is a real person and not a photo.
5. **Done**
   Your face is matched to your profile photo. If it matches, Discover unlocks.

Works in low light and on simple cameras

The check brightens the picture and tries several times before giving up, so a dim room or a basic front camera should still work. If you are struggling, these help:

- **Face a light.** A window, lamp or the lights of a room in front of you works best. Avoid a bright light behind you.
- **Use the screen light.** Tap **Dark where you are? Turn on screen light** and the screen turns white to light up your face. It turns on by itself when the room is very dark.
- **Hold the phone steady** at eye level, about an arm's length away.
- **Turn slowly.** A smooth turn is easier to follow than a fast one.
- **Wipe the camera lens.** A smudge is the most common cause of a blurry picture.
- **Take off hats and sunglasses.** Glasses are fine.
- **Update your photo** if you changed a lot (new beard, hair or glasses). Use a clear, well-lit, front-facing photo.

Your privacy

The check runs on your phone. Your live camera picture is not uploaded or saved. Only the result (passed or not) is stored.

YOUR PROFILE AND PASSES

Hangouts and the Vault

Hangouts

Hangouts are photos and short videos from places you have been, shown on your profile. They are meant to inspire plans, so there are no likes or comments.

- Add photos or a short video, write a caption and tag the spot if it is on RADA.
- Save as a **draft** first. Drafts are private until you publish.
- Other people can **join next time**, plan it, save the spot or say hi. You see who wants to join next time.
- Use **Share a hangout** to send it to friends.

Vault

The Vault keeps what you need on the night. Find your tickets and QR passes, see events and outings you have scheduled, check what is happening today and use fast-track entry where a venue offers it. Tap a pass to show its code at the door.

- Add outings and events to your calendar.
- Tickets and passes stay in one list so you are not searching your messages at the door.
- Explore trending events from the Vault to find your next plan.

FOR HOSTS

Hosting with the Creator hub

Switch on the Creator hub to host outings with a professional host profile.

1. **Switch on the hub**
   Turn on host tools from your profile or the Creator hub.
2. **Set up your host profile**
   Add your photo, a short bio and what kind of outings you run.
3. **Host outings**
   You can see requests, who is going and how many outings you have used this month.
4. **Grow your audience**
   Use broadcasts to update people who opted in to your news, and boost your outings.

What changes by plan

	Free	Pro	Elite
Outings a month	4	10	Unlimited
People per outing	Up to 10	Up to 30	No standard cap
Badge	None	Creator	Golden Creator
Photos and video	Photos	Both	Both
Broadcasts	–	2 a week	2 a day

New plans start with a 30-day trial. Boosts help more people see your outing but do not guarantee views, sign-ups or attendance.

FOR BUSINESSES

The Business Hub

Bring people to your place. Your storefront, offers, events and promotions all live in the Business Hub.

1. **Create your business presence**
   Choose your type (for example drinks and nightlife, food, or event organiser) and add your details and a cover photo.
2. **Claim your spot**
   Find your place in the list of community spots and tap **Claim spot ownership**. Upload proof so RADA can verify you.
3. **Add offers and events**
   Offers show on the Home feed. Set dates, a claim limit and fine print. You can edit or remove them without touching your profile.
4. **Get verified**
   Once approved, your storefront shows your business badge and you can buy boosts.
5. **Add your team**
   Give managers, editors or door staff their own logins, depending on your plan.

Boost your promotions

Boosts put an offer or event in Trending or a category row for a day or a week. You request a boost, RADA approves it, then you pay. You can see impressions and clicks afterwards. Results are never guaranteed.

Business plans

	Free	Pro	Elite
Badge	None	Business	Golden Featured
Team members	Just you	Up to 3	Up to 10
Golden badge on spots and offers	–	–	Yes

GOOD TO KNOW

Payments, safety and help

Paying for a plan or boost

Pay by M-Pesa. After you pay, submit your payment details in the app. An admin confirms it and your plan or boost starts. You can follow the status of each payment under **My payment claims**.

Safety

- **Report** a person, outing or listing from its menu. Reports are reviewed by the RADA team.
- **Block** anyone you do not want to hear from.
- The selfie check, reporting and blocking are always free.
- Read the **Community guidelines** in the app so everyone knows what is expected.

Fixing common problems

Problem	Try this
Camera will not start	Allow camera access for RADA in your phone settings, close other apps that use the camera, then tap **Turn camera on**.
Selfie check keeps failing	Face a light or use the screen light, hold still, turn slowly, and wipe the lens. Update your profile photo if it is old or dark.
I cannot see Discover	Discover is for verified singles. Set your status to single and pass the selfie check.
Plan limit reached	Wait until next month or upgrade your host plan.
A payment is not showing	Check **My payment claims**. If it is still pending after a day, contact support.

Need a hand?

Email **hello.rada.app@gmail.com** and tell us what happened. Screenshots help. We read every message.
